Speaker

Dr. Martin Gollner

Dear Ladies and Gentlemen,

Increasingly, patients in implantology are setting the treatment parameters. Today, they have higher expectations and possess extensive information about dental prosthetics. The financial framework is also discussed, often limiting the practitioner's concept. But why not use this as an opportunity? As a practitioner, you can address this and offer various solutions.

In this training, you will learn simple and safe ways to restore joy to patients with edentulous and partially edentulous jaws. The speaker Dr. Martin Gollner will show you the various possibilities and introduce you to the concept of Multi-unit System components. This allows you to provide your patients with fixed restorations despite a reduced number of implants.

While Monday focuses on theory, participants will learn the possibilities in hands-on exercises on Tuesday.

Look forward to an educational and exciting training – we look forward to seeing you.

Your Camlog Team

Program

Monday, 24 November 2025, 09.00 AM - 06.00 PM

09.00 AM
Welcome and introduction

09.15 AM
Treatment concept step by step
